Csc466 Assignment: Slide Show

As specified in the syllabus, you are required to craft and deliver a slide show which highlights your work on your programming/research project.

Here are the considerations that you should bear in mind for this assignment:

1. Your slide show should highlight your work in an interesting, informative, memorable, up-tempo kind of way.

2. A nice opening slide is important!

3. A nice closing slide presenting resources is important!

4. At least some form of demo is a must!

5. Graphics are nice!

6. Too much text is not nice!

7. You should be clear about what you have done, and distinguish it from what you might like to have done, or what you might like to do.

8. 10 minutes for your slide show.

9. 5 minutes for set up and question.

Finally, please post your slide show to your web work site.
