Racket Assignment #4: Lambda and Basic Lisp

Learning Abstract

In this assignment, I will learn the fundamentals of Lisp processing and Lambda functions using the Racket programming language. Through practical exercises, I will gain a foundational understanding of these concepts and how to implement them effectively in Racket.

Task 1: Lambda

Demo for Task 1a – Three ascending integers

Demo for Task 1b – Make list in reverse order

Demo for Task 1c – Random number generator
